Fluid Desk

Ventpack

The most productive software for designing ventilation, air conditioning and smoke control systems

www.fluid-desk.com

The ultimate 3D CAD & BIM platform for HVAC industry proffesionals

Design and optimize HVAC systems configure and purchase components, manage you projects and calloborate with your team through the cloud
Supported platforms: AutoCAD 2018-2020
BricsCAD V19-V20 Pro/BIM

Standalone version available since 2020!

Reasons why people are enthusiastic about Ventpack

Six main drawing function

### Element connection

Design ducts while maintaining a desired constant distance...
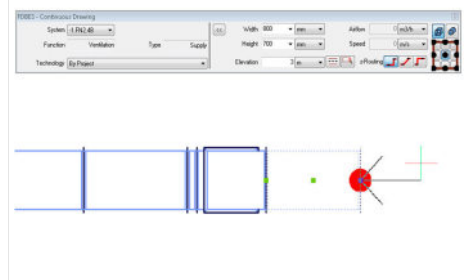

Read more...   See movie...

Insert element

Insert a fan or other fitting from the library into an existing sraight duct...
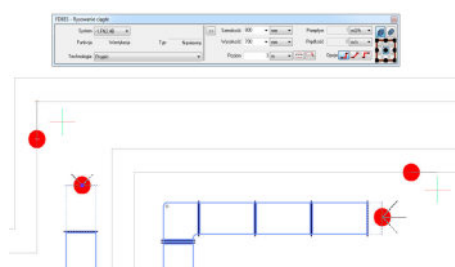

Read more...   See movie...

Continuous drawing

Design ducts turn-by-turn, specifying points on the drawing...
Read more...   See movie...

Continuous drawing with offset

Design ducts while maintaining a desired constant distance...
Read more...   See movie...

Cross section

Create cross section views of selected elements...

Read more...   See movie...

Auxiliary cross section

Transform selected elements to a temporary cross section view...
